AIRPLANE NOISE 508-325-7531

FIRE SAFETY— Don't play with matches!

- We live in wooden houses and we're surrounded by lush foliage. That makes fire safety a big shared concern. So please be extra careful with all open flames.
- Most fires in our area are caused by the improper disposal of fireplace and grill embers. They may seem cool, but give them a full 24-hours before disposal. Even then, use a metal (not plastic) disposal can and keep it off the deck.
- Did you know it's a fire insurance violation to use an open-flame grill on a second floor deck? If there's a fire, our insurance company can deny us payment.
- And remember, using fireworks in a wooded area like ours is just plain stupid.

ROAD SAFETY— Watch that speedometer!

- Tom Nevers residents call "speeding on Tom Nevers Road" our number one problem. With no bike paths or sidewalks to protect us, speeding cars and trucks are both terrifying and dangerous.
- Please keep your speed down to 40 mph on Tom Nevers Road...and 25 mph (or even less) on our private roads.

ANIMAL SAFETY— Hold that tiger!

- Dogs love to run free and frolic in Tom Nevers. But alas, there have been enough problems to now make that illegal.
- All dogs must now be leashed when off their owner's property...not only here but everywhere on the Island. It's the law! And fines start at \$50.

NOISE POLLUTION— Turn down that dial!

- Out here sound really carries. Please remember that when you play music, crank up the TV or radio, or hold outdoor parties.
- Airplane noise is something we're also constantly combating. If you hear it, jot down the dates and times and call the Airport "Noise Hot Line" to report it.

LIGHT POLLUTION— Dim those searchlights!

- We live in one of the few places where you can still see the full magnificence of the night sky. But bright outside lights can cancel out our ability to enjoy it.
- So turn "ON" our deck lights (40 Watt max, unless shielded) and outside floods only when absolutely necessary. We'll save energy and do our neighbors a great favor.

LITTER-FREE LIVING— Bag the trash!

- Always dispose of your trash in closed clear plastic bags...placed in covered outside containers. Otherwise, birds and animals and the winds will strew your refuse all across our area.
- And be a friend. Pick up any roadside litter you spot to help keep our area tidy!

DEER TICK WATCH— Check it out!

- Unless detected and removed promptly, those tiny deer ticks can lead to Lyme disease, Babesiosis and/or Ehrlichiosis. The best defense is to wear proper protective clothing and to perform vigilant "tick checks" after each outing.
- If you find a deer tick clinging to your skin, remove it carefully with tweezers, and take it with you to your doctor for confirmation and treatment.
